SUPPLEMENT TO REPORT #

THIS IS UNEVALUATED INFORMATION

This report is the result of a joint collection effort by the Air Force, the
Army and CIA, and is disseminated in accordance with the provisions of NSCID #7.

2. The depot has no refrigeration facilities or underground installations at the present time other than cellars. Refrigeration facilities are under construction. [redacted] Lack of labor and materials had caused delay in construction of this plant and it was still far from complete in Feb 56 although it was supposed to be ready for use in Aug 55. There were no plans for underground installations in Feb 56.
3. The depot is guarded by both military and civilian personnel. The military guards wear the regular Hungarian Army brown uniform and the civilian guards wear the black civil police uniform. In addition, the guards have dogs to assist in guarding the depot.
4. The depot is commanded by a Hungarian Army Quartermaster Captain. [redacted] he was trained in the USSR. There are approximately 75 civilians employed at the depot and 75-100 military personnel stationed here. The army officers have received training both in Hungary and in the USSR. Two of the officers formerly were in the old Hungarian Army.
5. There were no plans for moving the depot in the event of war. The depot, in case of war, was to issue out as much of the stored supplies as possible and defend the remaining stored supplies.
6. The 5th Military Ration Depot distributed rations to at least 40 units located within the district of Kiskunfelegyhaza. I don't remember any specific names

of units. [] several locations, such as:

Kiskunfelegyhaza: { Infantry unit
Recruiting unit
Officers' club
Military hospital

Kecskemet: { artillery unit
armored unit
[46 54 N - 19 41 E]

Bugac: { artillery unit
engineer unit
[coordinates unk]

Kiskunhalas: infantry unit
[46 26 N - 19 29 E]

Kumadaras: infantry unit
[47 25 N - 20 47 E]

Bekescsaba: type unit unknown
[46 39 N - 21 05 E]

7. All units are given a classification number by the Ministry of Defense which determines the caloric allowance per man as well as any special foods to be included. The breakdown is as follows:

Classification	Calories per day/man	Type units
1	2500-3000	prisoners infantry engineers
2	3000-3500	infantry engineers
3	3500-4000	engineers transportation signal
4	4000-4500	artillery antiaircraft artillery
5	4500-5000	armor officers schools
6	5000-5500	(air force & ground cr
7	5500-6000	(AAA crews
8	6200-6400	Officers' academies
9	6400-6800	(Military hospitals
10	6800-7500	(institutions (various

8. We also stored and issued combat rations for winter and summer. The types of rations did not change with the seasons but were the same for all year. We did not store any rations specifically designed for extreme cold weather. The normal combat ration was dry and we also stored C and D vitamins both as fluid and as pills for augmenting the combat ration. Vitamins were also used to supplement normal garrison rations.
9. A normal menu for a day would depend upon the classification or category assigned to the unit by the Ministry of Defense. Once a unit had received a category, it was never changed except by the Ministry. The menus are prepared two weeks in advance. Twice weekly goulash or meats, 50-120 grams for meats, was issued. Saturday and Sunday supper usually consists of cold cuts.
